

Enabling Seamless Hybrid Working

VMware Anywhere Workspace helps organisations get the most from hybrid working models, delivering the best user centric experience for a modern, flexible, and mobile workforce.

1

Device Access

VMware Workspace ONE is a digital platform that delivers and manages any app on any device by integrating access control, application management and multi-platform endpoint management. Work using a flexible digital workspace without sacrificing security and control.

2

Immediate setup anywhere

By adding and integrating VMware Horizon technology to the Anywhere Workspace organisations can rapidly deploy a secure virtual desktop and application environment that can be delivered to any device, anywhere and to any user. A fully controlled and secure Windows 10 experience from home is now as easy to implement as it is in the office.

3

Collaboration at the centre

The Anywhere Workspace helps people collaborate more effectively in the Hybrid Working environment. From video communication to file storage, collaborating is simple and effective.

4

End-to-end Security

Workspace ONE provides built-in Zero Trust security across users, apps, and endpoints establishes an interconnected, least-privilege system that empowers employees without sacrificing security.

5

Build Resiliency

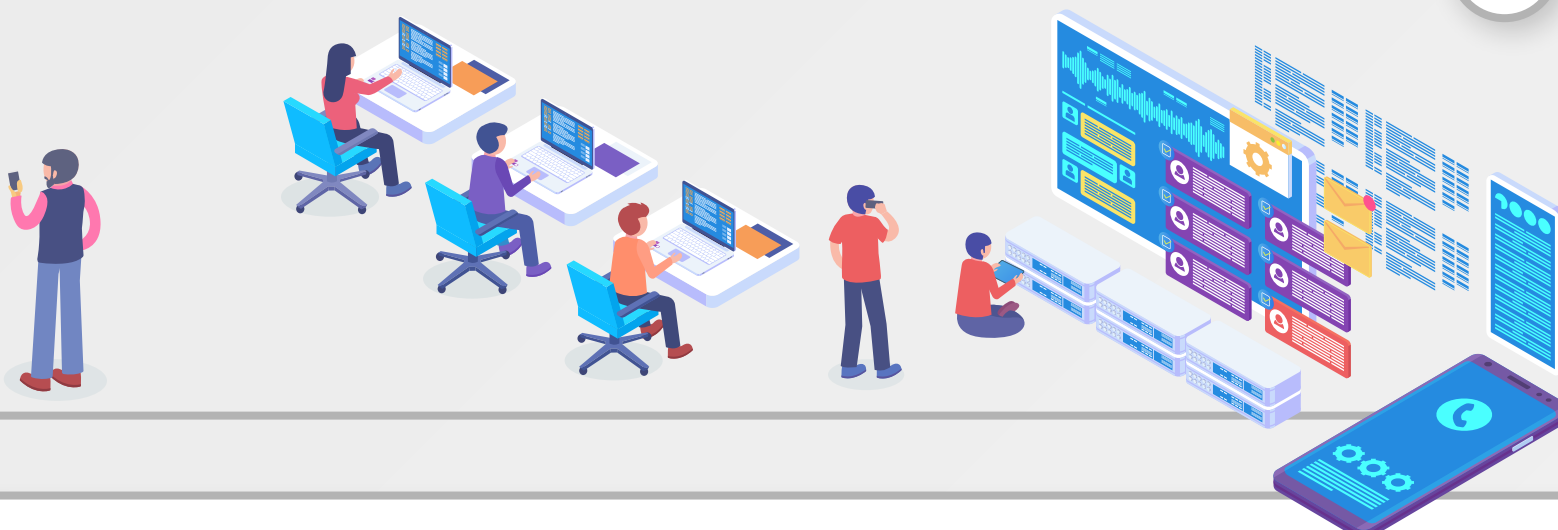

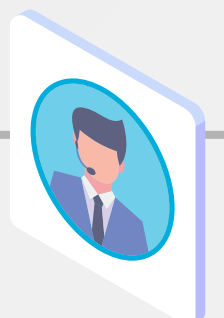

Adopt a scalable, cloud-based platform that offers the resiliency needed to meet change head-on with flexible deployment options across private and public clouds.

6

Seamless Support

Comms-care's team of highly skilled in-house VMware Consultants are on hand to provide end-to-end solutions, working to deliver Consultancy & Pre-Sales Support and Post-Sales support across our six-stage process - Envision, Assess, Design, Build, Maintain and Deployment.
